

**GSI-SLV  
welding trainer  
with new features**

Overall view of the welding trainer

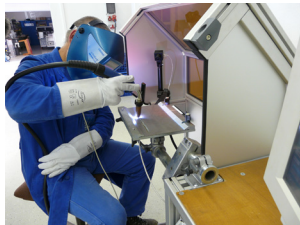

Computer-aided training in TIG, MAG and MMAW welding

- State-of-the-art training with the latest technology outside the welding cabin
- Saves resources and materials
- Minimises danger during training
- Matches real-life by using a real welding arc
- Features the same equipment as in the welding cabin
- Training, control and correction of movement while welding outside the welding cabin

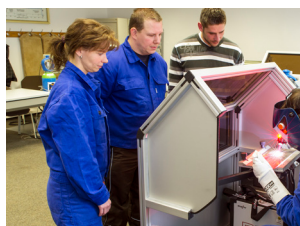

Generates an intelligent training plan – automatic training programme generation

TIG welding simulation on the welding trainer

MAG welding simulation on the welding trainer

Group training in the welding trainer cabinet

Training to plan -  
automatic generation  
of training courses  
depending on training  
goal required

Training to plan – the computer automatically generates a training programme depending on welding process selection and position
